Vardhman Nagar, Jaipur, Rajasthan 302018 • +91 78778 13745 • deepakvaishnav486@gmail.com

A results-driven MERN Stack Developer skilled in building responsive web applications and user-focused digital experiences. Adept at translating product requirements into clean, maintainable code and delivering end-to-end features across the MERN ecosystem.

## Experience

APRIL 2025 – PRESENT

### Junior Full Stack Developer

- Develop responsive UI components using **React, JS/TS**, and modern styling.
- Build REST APIs with **Node.js** and **Express.js**.
- Work with **MongoDB/MySQL** for data storage and queries.
- Convert **Figma** designs into clean, production-ready interfaces.
- Implement core application logic, authentication, and user flows.
- Test, debug, and optimize features for performance.
- Collaborate using **Git/GitHub** and follow clean code practices.

## Projects

### Read Recall – Chrome Extension

Collaborated with a 3-member team (one senior Software Engineer with 4+ years' experience + one junior developer). Built a Chrome extension that tracks reading activity and generates quiz-style flashcards to improve recall. Contributed to frontend components, data handling, UI/UX flow, and integration of memory-assist features.

### AI Green Tick – WhatsApp Business Management Platform

Developed a web interface enabling businesses to manage WhatsApp Business communication and run targeted campaigns. Built smooth, responsive UI with Role-Based Access Control (RBAC). Features include customer management, campaign creation, analytics-oriented dashboard, and business workflow handling.

## Skills

HTML, CSS, JavaScript, TypeScript, React.js, Node.js, Express.js, MongoDB, MySQL, REST APIs, Postman, Figma-to-UI workflow, Git/GitHub, Shad Cn, Bootstrap. Shopify Developer , Liquid Ajax API
